To install Apache, install the latest meta-package `apache2` by running:

```
sudo apt update
sudo apt install apache2
```

```
habiba@habiba-VirtualBox:/var/www/html$ sudo chmod a+rwx /var/www/html
habiba@habiba-VirtualBox:/var/www/html$ mkdir try
habiba@habiba-VirtualBox:/var/www/html$ sudo touch index.html
habiba@habiba-VirtualBox:/var/www/html$ sudo nano /var/www/html/try/index.html
habiba@habiba-VirtualBox:/var/www/html$ sudo chmod a+rwx /var/www/html/try
habiba@habiba-VirtualBox:/var/www/html$ sudo nano /var/www/html/try/index.html
habiba@habiba-VirtualBox:/var/www/html$
```

habiba@habiba-VirtualBox: /var/www/html

```
  GNU nano 6.2                /var/www/html/try/index.html
<html>
<head>
<title>Apache</title>
</head>
<body>
<p>hi from linux</p>
</body>
</html>
```
